EXECUTIVE SUMMARY

STEM FOUNDATION GRANT PROPOSAL

Looking for great math and science trade books for your kids?
Our STEM Foundation Grant Proposal may be the answer!

There are times when the obstacle to acquiring quality science, technology, engineering and math (STEM) support materials is lack of funding. But, more often than not, there are sources of money available. The real barrier, in most cases, is a lack of staff and/or time to generate funding requests.

With this in mind, we have developed much of the necessary paperwork to create a funding request for supplemental STEM materials. Just cut and paste from our STEM Foundation Grant Proposal to explain and justify the acquisition of our quality math and science trade books at extraordinary discounts.

Here's how it works. In this Proposal, we have provided the following:

- I. Background information on the U.S. crisis in math and science education,
- II. Ideas on how and where to secure funding, such as:
 - * PTA/ PTSA/ PTO resources
 - * STEM grants
 - * Title 1 funds
 - * Library monies for science/math-thru-literature materials
 - * Local clubs or organizations (e.g. Kiwanis or Rotary)
 - * Community, regional and national foundations
- III. Ways to use our books, including:
 - * Extending Learning Opportunities (ELOs)
 - * Incentive-based rewards for students
 - * Expansion of classroom and school libraries
 - * Tools for preventing downtime
 - * Book Fair and other fundraiser resources
- IV. Sample Budget, showing funders how much they get for their money,
- V. Articulation of how each book correlates to the national standards,
- VI. Information about programs that have used the Proposal successfully.

Science, Naturally offers **discounts of up to 70%**, with quantity purchase, to schools and other groups involved in STEM education.

Our award-winning trade books are the perfect way to expand and enhance your classroom curricula and our discounts cannot be beat. **All our titles are NSTA Recommended**, and the content in each corresponds with the national math and science standards.

Our STEM Foundation Grant Proposal works! Call us at 202.465.4798 to discuss working together. Full Proposal and Summary documents can be found at www.ScienceNaturally.com.
