Our Mission

Science, Naturally!, an imprint of Platypus Media, is a mission-driven press dedicated to the magic of discovery. We believe that a deep understanding of STEM is a fundamental right, best nurtured through engaging storytelling and expert-guided exploration. By demystifying intimidating topics in science, technology, engineering, and math through diverse characters, vibrant illustrations, and accessible literature, we translate complex concepts into the universal language of human curiosity.

Our collection is meticulously crafted alongside leading educators and scientists to support the vital pillars of modern learning: analytical thinking, problem-solving, and intellectual confidence. From classroom supplemental resources to literacy organization book boxes, we create books that grow with young minds by empowering teachers, inspiring students, and aligning with national educational benchmarks like the Next Generation Science Standards.

From our Washington, D.C. roots to our global reach in over nine languages, bilingual formats, and eBooks, we remain committed to one singular vision: bridging the gap between the blackboard and the blacktop, ensuring that underserved communities are empowered and that today's curiosity sparks the innovation that shapes tomorrow.

Frequently Asked Questions

Q: What types of books does Science, Naturally! publish?
Science, Naturally! publishes accessible, standards-aligned STEM books for children that demystify complex science and math concepts through engaging storytelling, as well as educational resources for teachers and parents designed to foster analytical thinking and curiosity.

Q: Do you offer resources for teachers and educators?
Yes! You can find all of our resources under our Educational Resources tab on the Science, Naturally! website. Many of our books come with comprehensive, easy-to-use teacher's guides. Our teacher's guides help fill out lesson plans and suggest activities that correlate with the book. Additionally, several books come with curricula articulations abiding by the National Science and Math Standards.

Q: How does Science, Naturally! work with partnerships?
We don't just sell books. We build bridges. Science, Naturally! loves getting our books into the hands of children who need them the most. That is why we have opportunities for literacy organizations, Title 1 schools, and WIC and health clinics by offering customization options like language, trim size, front & back matter, and competitive wholesale pricing.

Q: Questions about bulk orders, pricing, or something else?
Reach out to Info@ScienceNaturally.com with any and all questions.
